This morning, Rep. Bucshon (who serves constituents from the western side of the Hoosier state) and I went to the Crane Naval Surface Warfare Center in Crane, Ind. During our visit, we were briefed on the importance of the Crane base and the many unique functions that it performs. There is a firing range that tests weapons, even weapons used by our enemies. We also learned about mobile detection equipment, which helps ensure the safety of our military. Below are a few photos from today's tour and briefing.
