Washington, DC - U.S. Congressman Mike Pence voted today in favor of the Small Business Paperwork Mandate Elimination Act of 2011, which repeals the 1099 reporting requirement for Hoosier small businesses in ObamaCare.

"Repealing the onerous 1099 requirement from Obamacare is a victory for Hoosier families, small businesses and family farms, as it will cut bureaucratic red tape and foster job creation. Across Indiana, small businesses serve as significant job creators and this legislation will allow them to focus on growing their businesses instead of filing excessive paperwork.

"This bill will save taxpayers $20 billion over the next 10 years and help reduce the deficit by $166 million during that time.

"In these tough economic times, government should be looking at every opportunity to eliminate the red tape that only serves to stifle job growth."
