Washington, D.C. – U.S. Congressman Mike Pence congratulated Honda and the city of Greensburg for the announcement of the new production of Acura ILX luxury sedans at Honda's Greensburg plant. This new sedan will be Acura's first-ever hybrid model. Honda recently added a second shift in October, creating an additional 1,000 jobs at the Greensburg plant.

"I want to congratulate Honda and the city of Greensburg for the new production of Acura ILX luxury sedans at Honda's Greensburg plant," said Pence. "This announcement is welcome news to Greensburg and reinforces the fact that Indiana is a great place to do business."
